WORK EXPERIENCE

Anthology Inc, Bangalore Dec 2021 – May 2023

Associate Developer   Dec 2021 – May 31

- 1.5 Years of experience as an Associate Developer in software design, analysis, development.

- Worked in an integration team to integrate the product with 3rd party applications such as canvas, moodle and D2L.

- Experience in configurating and deployment of applications to the customer environment

- Developed custom code tailored to client specification for implementing new features or enhancing existing ones, with occasional bug resolution

- Excellent problem-solving and troubleshooting skills

- Strong communication, collaboration.

PROJECT

Personal portfolio website. Tech stack: *HTML CSS, React JS, Redux*

- Real world responsive portfolio website with email functionality using React JS, Bootstrap, Rxjs.

- Utilized ReactJS for component-based architecture, enabling dynamic content rendering and efficient reusability across pages for a seamless user experience.

- Applied modern CSS techniques to ensure mobile responsiveness, cross-browser compatibility, and an adaptive design for various screen sizes and devices.

- Followed best practices for clean code, modular component structure, and effective state management, supporting ease of maintenance and future scalability.

- Maintained version control through Git, enabling efficient project tracking, collaborative potential, and streamlined deployment.

-

- Bachelor's degree in ISE, Cambridge Institute of technology Bengaluru, June 2017 – July 2021

- Intermediate – PCMB, Alvas pre-university college. March 2015 – March 2017
